SKILLS

- Spearheaded the development of interactive and responsive web applications using the MERN stack (MongoDB, Express, React, Node.js) during a dynamic internship at E-skill web.
- Translated design mockups into pixel-perfect, cross-browser compatible user interfaces using HTML, CSS, and JavaScript, ensuring a consistent user experience across various devices.
- Leveraged popular CSS frameworks like Bootstrap and Tailwind CSS to streamline styling and layout, resulting in efficient and visually appealing UI designs.
- Engineered React components with a focus on reusability and modularity, implementing state management via Redux to achieve synchronized data flow and optimize performance.
- Orchestrated the creation of RESTful APIs using Node.js and Express, facilitating seamless communication between the front-end and back-end for efficient data transfer.
- Crafted MongoDB databases to store and manage application data, proficiently optimizing queries for improved database performance and responsiveness.

EDUCATION

DAVV , INDORE
B.COM

2014-2017

PROFILE

Dedicated web developer skilled in both front-end and back-end technologies. Adept at crafting engaging user experiences through clean code. Strong problem-solving skills and collaborative teamwork. Committed to staying current with industry trends and continuously expanding skill set. Goal: To create impactful web experiences that enrich users' lives.

WORK EXPERIENCE INTERN

MERN STACK DEVELOPER

AIMFORTECH SOLUTION   2023 Prasent

- Collaborated closely with a dynamic team of developers to design and build responsive web applications using the MERN stack (MongoDB, Express, React, Node.js).
- Translated design concepts into pixel-perfect user interfaces, employing HTML, CSS, and JavaScript to ensure seamless and engaging user experiences.
- Leveraged front-end frameworks such as Bootstrap and Tailwind CSS for efficient and consistent design and layout implementation.
- Developed interactive and reusable React components, effectively managing state through Redux to optimize data flow and application performance.
- Designed and implemented RESTful APIs using Node.js and Express, facilitating smooth communication between the front-end and back-end layers.
- Efficiently managed MongoDB databases, optimizing queries for improved data retrieval performance and application responsiveness.
- Enhanced user security and real-time functionality by integrating Firebase authentication and database features.
- Participated actively in collaborative UX/UI design discussions, contributing to transforming wireframes into user-centered interfaces.

Project   2023 prsent

Partha Store

- Pioneered a user-friendly and visually captivating Simple Food Store app using React with Context, providing customers with effortless food browsing and streamlined ordering . Implemented React Context API to optimize state management, ensuring seamless data flow and amplifying app performance .

Quate Genretar

- Developed and elevated a simple Quote Generator application using React, demonstrating mastery of front-end development principles. Developed highly interactive and dynamic features, leveraging the power of React components and advanced state management techniques

Support desk Api

- Front-End: HTML, CSS, JavaScript, React.js, Redux, Bootstrap
- Back-End: Node.js, Express.js, MongoDB
- API Development: Design and implementation of efficient support desk APIs
- Database Management: MongoDB, Firebase
- State Management: Redux for optimized data flow
- Version Control: Git and collaborative development workflows
- Deployment: Heroku, Git
- UI/UX Design Integration: Transforming wireframes into intuitive interfaces
- Responsive Web Design: Ensuring optimal user experiences across devices
